Reminder On Farm Storage

Spring planting is a good time to look ahead to harvesttime storage needs for grains and other storable crops, according to J. P. Alvis, Jr., Chairman of the Appomattox County Agricultural Stabilization and Conservation (ASC) Committee.

He reminded farmers that the loan program for farm storage and drying equipment was recently liberalized, with the loan interest rate being lowered to 6% and an increase in the maximum loan amount being included as part of the changes.

Storage facility loans may be made on the basis of two years' production of a farm'ers crops which are eligible for price - support loans. The maximum loan or outstanding aggregate balance is now $35,000. Also the previous loan limit of $5,000 on drying equipment has been removed.

Mr. Alvis said eligible producers may obtain loans to buy needed drying equipment as well as to build new structures, pointing out that the last few years have seen development of many new harvesting, conditioning and storage techniques for farm crops.

Full details on farm storage and drying equipment loans are available at the Appomattox County ASCS Office.
